RE: Lesner Bridge Alignment

Dear Mr. Jarman:

This is to inform you that the Bayfront Advisory Committee (BAC) formally recommended that the City pursue the southern alignment for the proposed Lesner Bridge replacement project at its February 19, 2009 Public Meeting. In addition to recommending the southern alignment as its preference, the BAC also recommended that the relocation of the replacement Dominion Power transmission line required for the southern alignment be placed underground / underwater as a submarine cable rather than relocated as an above-ground cable.

It is our understanding that many individuals and groups in the Bayfront Community have also endorsed the southern alignment as the preferred alternative. Hopefully this broad consensus of opinion will help to expedite work on this vital project.

As always, please do not hesitate to contact me if I may provide any clarification on this matter. The BAC sincerely appreciates the time you have committed to brief the BAC on Lesner Bridge and your efforts to extend the public comment period to February 25.

Sincerely,

Kal Kassir  
Chairman  
Bayfront Advisory Committee
